The problem

After every meeting, PMs do this:

- ❌ Open Jira. Stare at a blank ticket.
- ❌ Try to remember who said what.
- ❌ Type it up. Miss half of it.
- ❌ Sprint starts. Someone asks "Wait, didn't we agree on X?"
- ❌ Scroll Slack. Check notes. Nobody remembers.

Sound familiar?

You are not alone.

NEW FEATURE

Jira Cloud Sync

Drop in a meeting recording. Get a structured backlog. Hit sync. Jira updates in seconds.

Connect to Jira (Optional)

Jira Base URL:

https://company.atlassian.net

Email:

your-email@company.com

API Token:

Project Key:

e.g. PROJ

Sandbox Mode: No Jira account needed

4 tickets created automatically
Owners assigned from conversation
Story points estimated by AI
Synced to your Jira board instantly

HOW IT WORKS

3 steps. 45 seconds.

1

Drop your meeting

Paste text, upload a file,
or record live audio.

2

AI extracts everything

Action items, owners,
priorities, story points.

3

Sync to Jira

One click. Your board
updates instantly.

45 min standup = 4 Jira tickets

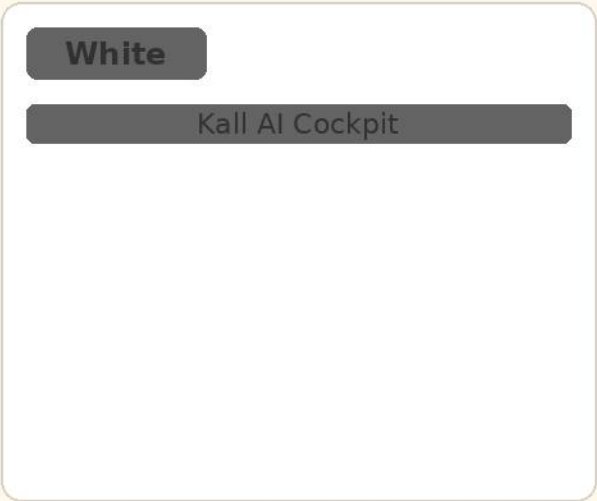

Before your coffee gets cold.

ALSO NEW

4 interface themes.

Pick what works for your eyes.

BY THE NUMBERS

10+

hours saved per sprint
